INTRODUCTION

We would like to welcome our colleagues to the International Business Tourism Transport Technology Social Sciences Humanities Education Research Conference. It is the seven series in 2016 of Conference on Business Tourism and Apply Sciences was held in Amsterdam. As always many members of the ICBTS 2016 community look forward to meeting, sharing and exchanging their research ideas and results in both a formal and informal setting which the conference provides. Likewise, the concept of alternating the international conference every one month on April to November between Europe and the rest of the world is now well established. This year’s event in London (UK) Paris (France) Munich (Germany) Amsterdam (Netherlands) Boston (USA) Toronto (Canada) London (United Kingdom) Zurich (Switzerland) Berlin (Germany) Tokyo (Japan) and another continues with the cultural following the very successful and productive event held in London-Zurich in August 2016 in the field of various types for international academic research conference on Business Economics Social Sciences Humanities Education and Apply Sciences. As usual The ICBTS 2016 brings together leading academics, researchers and practitioners to exchange ideas, views and the latest research in the field of Business Tourism and Apply Sciences.

The theme of this event The 2016 ICBTS International Business Tourism Social Sciences Humanities and Education Research Conference is “Opportunities and Development of Global Business Economics Social Sciences Humanities and Education” It is also represents an emerging and highly challenging area of research and practice for both academics and practitioners alike. The current industrial context is characterized by increasing global competition, decreasing product life cycles, Global Business, Tourism Development, Social Sciences Humanities Education Apply Sciences and Technology collaborative networked organizations, higher levels of uncertainties and, above all, and customers. In our view holding this event in Tokyo represents a timely opportunity for academics and researchers to explore pertinent issues surrounding Business Economics Tourism Social Sciences Humanities Education Sciences and Technology.

Potential authors were invited to submit an abstract to the International Conference Session Chairs. All abstracts were reviewed by two experts from the International review committee and final papers were further reviewed by this volume with 30 contributing authors coming from 18 countries. This book of proceedings has been organized according to following categories:

- Business
- Management
- Marketing
- Accounting
- Financial
- Banking
- Economic
- Education
- Marketing
- Logistics Management
- Social Sciences
- Supply Chain management
- Industrial Management
- Information Technology
- Sciences Technology
- Transport and Traffic
- Tourism Strategic
- Tourism Management
- Tourism Marketing
- Tourism Development Policy and Planning
- Technology Application
- Communication and Sciences
- Humanities
- Health care Management
- Hospitality Management
- Hotel Management

ORGANIZING BY
ICBTS Conference Center & CK Research Thailand
SPEAKER BACKGROUND

Professor Dr. Ebrahim Soltani

Prof. Dr. Ebrahim Soltani is a Professor of Business School at University of Kent Canterbury in England and he is Department Chair - Quality & Operations Management at Hamdan Bin Mohammed Smart University Dubai of United Arab Emirate. He was appointed associate professor in business management, total quality management, and operation management in 1989 at the University of Kent, he continued his research in the field of operation management, business management. He has published over 50 papers and reports in such journals as International Journal of Technology and Production Research. He supervised a considerable number of PhD theses and is a consultant on industrial and production industry in England and United Arab Emirate.

SPEAKER BACKGROUND

Professor Dr. Kai Heuer

Prof. Dr. Kai Heuer is full professor for business administration at the Business Faculty of Wismar University in Germany. Before, he served as a full professor at the Environmental Campus of Trier University of Applied Sciences. He studied business administration in Germany and the U.S.A. and holds an MBA and a doctoral degree. He has management experience from leading positions in different companies and as business consultant. His research areas are management accounting, organizational development, and international management where he has published numerous papers, reports and textbooks. He is the head of Master Program in Business at Wismar University and a member of the Schmalenbach-Society for Business Economics, Cologne; managing director of the Institute of Health-, Senior- and Social Management; and a former member of the board of the Centre for Aviation Law and Management.
Dr Tariq Khan

Dr Tariq Khan is a Lecturer and Director of Postgraduate Programmes of Business School in Brunel University, Uxbridge, London, United Kingdom. He received his BEng in Aerospace Engineering from Kingston University, his MSc in Manufacturing Technology from University of Warwick, and his PhD in Intelligent Education Systems from University of Salford. He subsequently worked as a research associate in Heriot-Watt University Edinburgh and as a senior lecturer at London Metropolitan University. He has specialist teaching in Business Process Modelling, Web Programming, Software Engineering, Classical Logic, Human Computer Studies. He has Book and published over 20 papers and reports in such journals as Information Systems Evaluation and Integration (ISEing). He supervised a considerable number of PhD theses and is a consultant on business and supply chain and engineering industry in England and United Kingdom.

Dr Chayanan Kerdpitak

Dr Chayanan Kerdpitak is a Lecturer and management committee of Doctor of Business Administration Programmes of College Management Innovation in Valaya Alongkorn Rajabhat University in Thailand and a management committee of CK Research Consultant in Bangkok. I was a Lecturer of Principle Marketing, Sales Management, Consumer Behavior, and Marketing Research at The Suan Dusit University in Thailand. She received a Ph.D. in the field of Business Logistics within Industrial at Ramkhamhaeng University, Thailand. She has published over 20 proceeding paper and some reports in such journals as International Journal Business and Economics Research. She has been a consultant on Import Automobile Industry from Germany for International Marketing and Marketing Research. Chayanan graduated a B.B.A and M.B.A in Business Administration from The Ramkhamhaeng University, Bangkok, Thailand (Major in Marketing).

ABSTRACT

Pattern design fashion products from the carp weave concept aims to investigate the ongoing use of images of fish in contemporary Eastern (Oriental) design patterns. The mixture of fashion and lifestyle achieves commercial success by incorporating the interpretation of the carp weave, a symbol of faith in abundant wealth and prosperity. To weave these elements requires the development of a prototype design with contemporary colors and composition of stripes. This is then brought to experts and business operators to assess the suitability of the patterns. The pattern evaluation is then performed involving the distributor of fashion products and the experimental data are statistically analyzed using percentages.

The results showed that the use of the weave and the composition of the carp weave were developed in the design prototypes with the colors and compositions of the designs numbering 15 shirts; six professionals and entrepreneurs were satisfied at the highest level. The colors and patterns incorporated in fashion products using eight stripes resulted in satisfaction at the highest level for those particular patterns. The fashion product category of scarves had high satisfaction levels with the introduction of the patterns. Other types of fashion and lifestyle products incorporated the patterns in a total of eight designs for the manufacturing of prototypes of fashion scarves sized 100 cm x 100 cm, which were sold experimentally in the BIG & BIH 2016 fairs at the BITEC Exhibition Centre.

Keywords – carp fish weave, pattern design, fashion product, Oriental Pattern

INTRODUCTION

The handmade crafts of the people of Southeast Asia have their own uniqueness and specific identity. In Thailand, the local wisdom and Thai identity, particularly in weaving works, are the old wisdom that has been inherited from generation to generation. Carp fish weave made from palm leaves is another type of traditional Thai craft that is connected to the ways of life of Thai people whose lives are attached to the river. The ‘Silver Barb’ is a freshwater fish that is a symbol of prosperity and fruitfulness. According to the ancient belief, hanging carp weave over the child’s cradle is done in order to wish them good health. This belief exists in every social class, from general people to nobility, as we can see in the ceremony of blessing the royal child and his or her cradle. Due to the long-term relationship between the carp fish weave and the Thai lifestyle, the researcher utilized this idea to design the Thai and oriental fusion patterns to be contemporary and able to increase value, and to develop them for commercial fashion products.
Carp weave in the ceremony of blessing the royal child and his or her cradle

LITERATURE & THEORIES

The research of designing fashion pattern from carp fish weave is a study pathway using theories and related documents as follows.

Background of Carp Weave and Coloring
Carp weave is a handmade item from Thai local wisdom, previously made using long and thin palm leaves to weave into the shape of the silver barb. In the past, Thai people mostly worked as farmers. In the canals, there are a lot of silver barbs. Thus, they became the symbol of prosperity because the growth to maturity of the fish is the same time period as that of rice bearing grains. Moreover, people fashionably hang the carp fish weave over the child’s cradle in order to wish them to be healthy. There are two types of carp fish weaves: beautiful patterns and decoration in the reign of King Rama V, and the natural pattern.

Oriental Pattern or Southeastern Pattern
The oriental pattern originates from the idea and composition of the natural landscape in combination with the religious beliefs and local art and culture. In the materialistic era, the modern trends often change as there are many new innovations and technologies causing the mixture of the evolution of pattern design connected to the current and more contemporary ways of living.

Fashion Trends
The fashion trends in 2017 are stated in the articles about Hometown Discovery, Andaman Sun Spirit, Oriental Express, and Zen & Serene. The researcher selected the Oriental Express trend group by choosing the similar colors or natural colors that transmits warmth, liveliness, happiness, energy and fruitfulness.

RELATED WORKS OR DISCUSSION
The research of the fashion pattern design from carp fish weave referred to the related researches such as the design and development of patterns from the arts in Wat Phra Dhat Pha sorn kaew Temple to be applied for the casual clothes.
Based on the reference research, the researcher adapted the design and development process of the patterns from the arts found in Wat Phra Dhat Pha sorn kaew Temple to use with the casual style clothes as reference.

**METHODOLOGY**

To design the patterns of fashion products from the carp fish weave idea, the researcher applied the methods as follows:

- Study the background of carp fish weave and Thai ways of living and beliefs
- Study the patterns of carp fish weave
- Study the identity of oriental patterns

**Conceptual Framework**

- Design and develop the patterns to apply to fashion products;
- Create the identity that represents contemporary Southeast Asia

**Conclusion and Confirmation**

- Evaluation of the pattern by experts and business owners

Use the selected patterns to create the original works of fashion products

Apply the original products to test the market

- Build knowledge
- Present the research
Table 1 Research Methodology

RESULTS SUMMARY AND FUTURE WORK

According to the study of the carp fish weave background and Thai ways of life and beliefs, patterns, coloring, the carp fish weave and the uniqueness of the oriental patterns, the researcher summarized the interpretation of patterns in connection with Southeast Asian lifestyles as follows:

<table>
<thead>
<tr>
<th>Carp Fish Weave Patterns</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image1.jpg" alt="Patterns representing the Oriental style" /></td>
</tr>
<tr>
<td><img src="image2.jpg" alt="New designs and developments" /></td>
</tr>
</tbody>
</table>

Table 2 Results Summary and Future Work

Analysis from the experts and business owners

According to Table 2 showing the Results Summary and Future Work, the researcher brought the 15 patterns to be evaluated by the experts and business owners to determine if the patterns can be used for commercial products. The process rated eight patterns, which are as follows:
New designs and developments

Table 3 Selections of the experts and business owners

According to the analysis results from the experts and business owners consisting of three persons, the satisfaction toward the eight patterns is at the highest level with the mean at 4.42.

- The respondents were satisfied with the patterns and coloring of scarves at the highest level with the mean at 4.42.

- The respondents were satisfied with the patterns and coloring of the other products at the highest level with the mean at 4.25.

In addition, the researcher applied the patterns to product scarves, the size of 100 cm x 100 cm, and sold them in BIG & BIH at BITEC Bangna Bangkok in May 2016, in collaboration with Siam Malaya Co., Ltd. under the brand name “Plataraa”. 
CONCLUSION

The results showed that the imports of the weave and the composition of carp weave develop a design prototype with the color and composition of marking number 15 shirt, professionals and entrepreneurs of six people are satisfied at the most. The color and pattern masters saw fit to fashion products of eight stripes satisfaction is at the highest level at that pattern, the fashion product category scarf and satisfaction levels with the introduction of patterned it to do.

ACKNOWLEDGMENTS

The researcher would like to thank the Institute for Research and Development, Suan Sunandha Rajabhat University who supported the research. Also, I am very grateful to the experts and the business owners who were willing to participate in the evaluation of the pattern designs, and Associate Professor Dr. Jaruphan Supprung and Assistant Professor Dr. Thanaphan Boonyarakalin who gave their advice and examined the research.
