INTRODUCTION

We would like to welcome our colleagues to the International Business Tourism Transport Technology Social Sciences Humanities Education Research Conference. It is the seven series in 2016 of Conference on Business Tourism and Apply Sciences was held in Amsterdam. As always many members of the ICBTS 2016 community look forward to meeting, sharing and exchanging their research ideas and results in both a formal and informal setting which the conference provides. Likewise, the concept of alternating the international conference every one month on April to November between Europe and the rest of the world is now well established. This year's event in London (UK) Paris (France) Munich (Germany) Amsterdam (Netherlands) Boston (USA) Toronto (Canada) London (United Kingdom) Zurich (Switzerland) Berlin (Germany) Tokyo (Japan) and another continues with the cultural following the very successful and productive event held in London-Zurich in August 2016 in the field of various types for international academic research conference on Business Economics Social Sciences Humanities Education and Apply Sciences. As usual The ICBTS 2016 brings together leading academics, researchers and practitioners to exchange ideas, views and the latest research in the field of Business Tourism and Apply Sciences.

The theme of this event The 2016 ICBTS International Business Tourism Social Sciences Humanities and Education Research Conference is "Opportunities and Development of Global Business Economics Social Sciences Humanities and Education" It is also represents an emerging and highly challenging area of research and practice for both academics and practitioners a like, The current industrial context is characterized by increasing global competition, decreasing product life cycles, Global Business, Tourism Development, Social Sciences Humanities Education Apply Sciences and Technology collaborative networked organizations, higher levels of uncertainties and, above all, and customers. In our view holding this event in Tokyo represents a timely opportunity for academics and researchers to explore pertinent issues surrounding Business Economics Tourism Social Sciences Humanities Education Sciences and Technology.

Potential authors were invited to submit an abstract to the International Conference Session Chairs. All abstracts were reviewed by two experts from the International review committee and final papers were further reviewed by this volume with 30 contributing authors coming from 18 countries. This book of proceedings has been organized according to following categories:

- Business
- Management
- Marketing
- Accounting
- Financial
- Banking
- Economic
- Education

ABSTRACT

Knowledge exchange on the system development on incomplete grade change via the online channel conducted by academic service group / academic report sub-section aimed at 3 aspects: 1) to develop and improve the process / operation of personnel; 2) to develop system concerning incomplete grade change; and 3) to apply the results found to improve routine responsibility leading to research work. The method was based on group meeting to consider acquire knowledge for operational process. The group was from 7 units – 1) Academic Services Department; 2) Faculty of Management Science; 3) College of Innovation and Management; 4) College of Logistics and Supply Chain; 5) Nakhon Pathom Academic Service Center; 6) Faculty of Fine Arts; and 7) Faculty of Humanities and Social Science. The group was then design the system and proposed to experts for review and suggestion.

The problems and barriers found consisted of the long steps of changing incomplete grade from filling the form, submitting to the faculty, and gathering all forms submitted to the office of registrar. These created the delay, in particular, when the large number involved. The group made a consensus in applying technology to resolve the spectacles. Therefore, the incomplete grade could be changed via the online channel to reduce the time wasted along the complicated process, and the number of paper.

Keywords: system development, grade result, Suan Sunandha Rajabhat University

INTRODUCTION

The academic service group consisted of 6 chambers – curriculum and instruction, admission, registration, on-the-job training, academic report, graduation inspection, degree approval and academic documents. The incomplete grade change operation deals with supporting staff. The cooperation to find the solution for the delay of incomplete grade change was formed, having staff from 1) Academic Services Department; 2) Faculty of Management Science; 3) College of Innovation and Management; 4) College of Logistics and Supply Chain; 5) Nakhon Pathom Academic Service Center; 6) Faculty of Fine Arts; and 7) Faculty of Humanities and Social Science.

Similar to all colleges throughout the world, the incomplete grade change could be done with the next academic semester / term. The tradition process took time and caused a delay. The group members decided to employ technology to help solve the problem mentioned, in particular to save time, which was in line with the university policy in terms of technology application for efficiency improvement.

In addition, academic report sub-section has constructed the knowledge management specified by the university, serving the first strategy “Develop the university to become sustainable niche guru.” This also responded to the university’s goal in terms of management with good governance.

OBJECTIVE

1. To develop and improve process / operation of Suan Sunandha personnel
2. To develop incomplete grade change (I) via online
3. To employ the result as a guideline for routine development to research

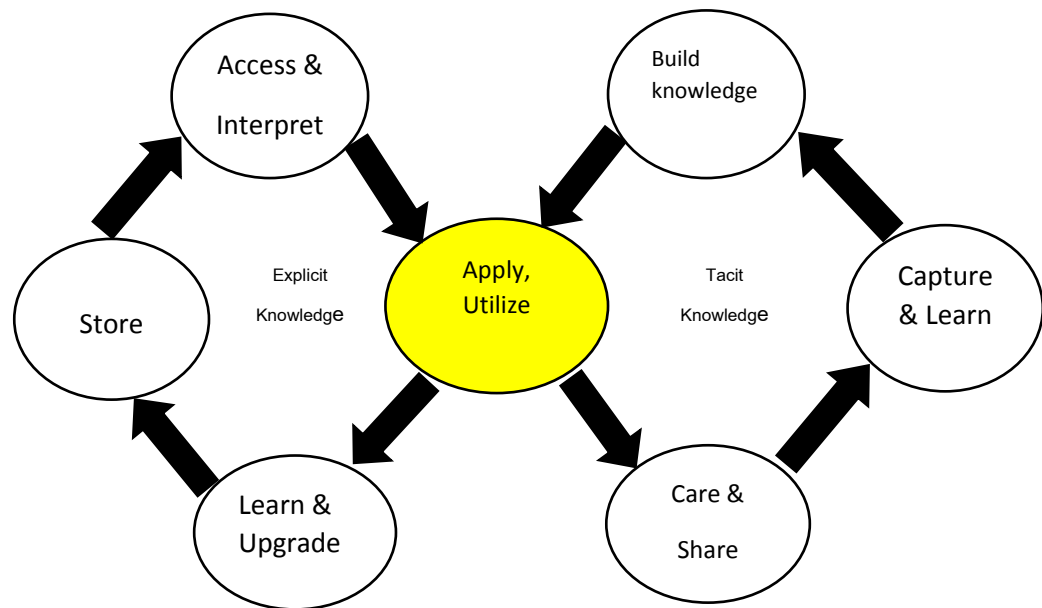

RESEARCH SCOPE

1. In terms of area, the knowledge exchange focused on the development and improvement of system / operation on the incomplete grade change (I) via online of Suan Sunandha
2. In terms of content, basic information, the action, output and outcome were focused overall
3. In terms of time, the action was conducted in 2016 fiscal budget year, during October 2015 – September 2016.

RESEARCH CONCEPT

Knowledge Management Theory

Surachart Maleesri (2013) described that knowledge management known as KM was a tool for achieving at least 3 circumstances: work, personnel development, and organization. As a result, knowledge management was not for its goal. If this concept was not clear, it could create fake knowledge management. Knowledge could be classified into 2 groups: Explicit knowledge – knowledge found in documents, text, operation manual; and Tacit knowledge – knowledge embedded in people via experience and wisdom. The two has different way of management. Explicit knowledge concentrated on accessing to resource, examining, interpreting, in which new knowledge was constructed, and the conclusion / results would be employed as reference (left circle). On the other hand, tacit knowledge concentrated on sharing, leading to new knowledge construction, in which all members could apply for individual work. [1]

Evaluation and Measurement Theory

Gronlund & Linn (1990: 5) defined that measurement is a process that describe the level of differences among individuals by number. [2]

Boontham Kitpreedaborisuth (2000:15) defined that evaluation was a process for judging the value of something based on certain criteria. [3]

Process development Theory

Edwards (1985:20) described the circle for development as follows:

1. System Analysis – was the process that happened after a request or need was raised in order to improve the system. A feasibility study had to carefully focus before designing new system.

2. System Design – was the process that designed the appropriate specifications of relevant system / program prior the use of prototype.

3. System Development – was the last process of the system circle. The inspection and evaluation were required for the completion of system before introducing to the users. [4]

Related Researches

Somdech Rungsrissawat, (2015) This research aimed to study, search, analyze, and find the correlation of factors that affect the image and brand of tourist attraction at Amphoe Bang Khonthi, Samut Songkhram Province, include searching and participating of citizens at Amphoe Bang Khonthi. And to upgrade Amphoe Bang Khonthi as a tourist attraction for sustainable tourism. The research combines both quantitative and qualitative research with the sampling tourists at Amphoe Bang Khonthi of 400 people, natives of 70 people, community leaders of 16 people, and experts in marketing communications and travel of 3 people.

The result found that the people perceptions are peaceful nature, quietness, not crowded, not fake, delicious food, cheap product prices, and friendliness of local people. The perception for brand is ecological agriculture (Agro-brand) which focused on lifestyle gardeners suffice.

Factors contributing to the creation of image and brand at Amphoe Bang Khonthi found 3 main factors: 1. magnet of attraction particularly naturalness 2. transportation and convenient access and 3. to

recognize the target tourists. Despite the model analysis software “LISREL” found that the perception of “brand” and “satisfaction” to Amphoe Bang Khonthi has the direct impact on loyalty in tourism destinations at Amphoe Bang Khonthi. For the perception of “image” resulted indirectly impact through brand awareness and satisfaction with the tourist at Amphoe Bang Khonthi. Therefore, it can clearly say that branding in a tourist target consumer is particularly important.

The participation of citizens in Amphoe Bang Khonthi found that most people do not engage in communication and image building and branding of Amphoe Bang Khonthi. It can be said that citizens participate indirectly by selling goods with friendly prices and give good services to tourists.

To upgrade Amphoe Bang Khonthi to a national tourism and has sustainable tourism, the result found that, it is possible because there are many tourist attractions and famous selling points. This should focus on the brand in 3 groups: 1. Tourism history/historic/archaeological-remains 2. floating market tourism 3. agro-tourism. All of this, all mechanicals must drive together particularly high ranking government officers must help pushing this matter. People in the community and vendors have helped to create for people in the community to earn the business of tourism that is sufficient to sustainable life.

The discussion has found an interesting characteristic which is Brand Bang Khonthi "Amazing Number 4 Bang Khonthi, the way of Thai" 4 markets, 4 temples, 4 fruit gardens, and upgrade into national tourist attraction especially since Bang Khonthi is a tourist attraction that not "perfunctory". [5]

Aumpai Yongkulvanich, et al. (2011) revealed the results of their study concerning model development for grading and grade submission via IT system at Ubon Ratchathani Rajabhat University that the faculty members responded to the new model at a high level. The model consisted of grading, submission, and grade filing. The system was inspected and verified via reference and confirmation codes. [6]

METHODOLOGY

Data Analysis

The academic report sub-section has specified the knowledge on process development on incomplete grade change via online channel. The meetings among group members were set occasionally, beginning from flow chart comparison between the conventional and traditional models. The new system was designed and improved from time to time, and finally approved by members. The model was sent to specialists for approval and comments. The final model was completely set and ready for applying.

Conclusion

The knowledge exchange on the system development on incomplete grade change via the online channel was conducted occasionally through steps – meeting for understanding making, small group meeting, lesson-learned analysis, leading to knowledge which could resolve the problem with comfort and convenience.

Conventional and Traditional Comparison

Traditional process	Conventional Process	Improvements
<pre> graph TD Start[Start] --> A[Grading and grade report on "I" by the office of registrar] A --> B[The office of registrar reports "I" grade according to faculty member's code, college / faculty] B --> C[The office of registrar follows up the grade change via document] C --> D[Faculty member submits grade change form] D --> E[Faculty / College collects all forms being submitted and asks for approval from board] E --> F[Faculty / College notifies for grade change to the office of registrar] F --> G[The office of registrar acknowledges the grade change] G --> H[The office of registrar records the change] H --> Finish[Finish] </pre>	<pre> graph TD Start[Start] --> A[Grading and grade report on "I" by the office of registrar (Cut)] A --> B[The office of registrar reports "I" grade according to faculty member's code, college / faculty] B --> C[The office of registrar follows up the grade change via document] C --> D[The office of registrar open and close the system fort grade change vidocument] D --> E[Faculty member submits grade change via online system] E --> F[Faculty / College collects all forms being submitted and asks for approval from board] F --> G[Faculty / College confirms the grade change via online] G --> H[The office of registrar acknowledges the grade change] H --> I[The office of registrar records the change in the system] I --> Finish[Finish] </pre>	<ol style="list-style-type: none"> 1. Identify the open and close system date according to academic calendar 2. Faculty member submits grade change via online system and notifies to faculty / college 3. Faculty/College issue a summary report on the correction of the results of the study to request that the meeting approve the correction of the results and confirm the resultsin the Internet 4. Faculty / College confirms the grade change via online system with approval from board 5. Vice-president for academic affairs approve the grade change; the office of registrar puts the change to the system 6. Grade change forms / document concerned are not required

The results after applying and implementing this model were that: the operation process was shorter; the time employed was reduced; the amount of document filing was very lower; and the efficiency and effectiveness were higher.

ACKNOWLEDGMENTS

The author would like to thank the Research and Development Institute, Suan Sunandha Rajabhat University, Bangkok, Thailand for the financial support.
