About IASTEM:

International Academy of Science, Technology, Engineering and Management (IASTEM) is a non-profit private association dedicated to the promotion of International education and university cooperation in the field of Science, Technology, Engineering and Management. It is a Branch of The International Institute of Engineers and Researchers (The IIER).

About IRAJ Research Forum (IRF):

The IRAJ Research Forum is an International non-profit academic association under ‘People’s Empowerment Trust’ with the stated goals of promoting cooperation among scientists, defending scientific freedom, encouraging scientific responsibility, and supporting scientific education and science outreach for the betterment of all humanity. It is the one of the world's largest and most prestigious general scientific society.

Objective of IRF:

- To provide a world class platform to researchers to share the research findings by organizing International/National Conferences.
- To use the research output of the conference in the class room for the benefits of the students.
- To encourage researchers to identify significant research issues in identified areas, in the field of Science, Engineering, Technology and Management.
- To help dissemination of their work through publications in a journal or in the form of conference proceedings or books.
- To help them in getting feedback on their research work for improving the same and making them more relevant and meaningful, through collective efforts.
- To encourage regional and international communication and collaboration; promote professional interaction and lifelong learning; recognize outstanding contributions of individuals and organizations; encourage scholar researchers to pursue studies and careers in circuit branches and its applications.
- To set up, establish, maintain and manage centers of excellence for the study of related subjects and discipline and also to run self supporting projects for the benefit of needy persons, irrespective of their caste, creed or religion.
Conference Committee

Program Chair:

Dr. P. Suresh
M.E, Ph.D. Professor and Controller of Examinations,
Karpagam College of Engineering,
Coimbatore, India

Conference Manager:
Mr. Bijan Kumar Barik
Mob: +91-9776047497

Conference Convener:
Miss. Puspalata Das, IASTEM
Mob: +91- 8339973162

Publication Head:
Mr. Manas Ranjan Prusty,
IRAJ, India

INTERNATIONAL ADVISORY MEMBERS

Prof. Goodarz Ahmadi,
Professor, Mechanical and Aeronautical Engineering, Clarkson University, USA

Dr Chi Hieu Le,
Senior Lecturer, University of Greenwich. Kent ME4 4TB. United Kingdom

PROF. (ER.) Anand Nayyar
Department of Computer Applications & I.T.KCL Institute of Management and Technology, Jalandhar
G.T. Road, Jalandhar-144001, Punjab, India.

Prof. R. M. Khaire,
Professor, Dept. Of Elex. and Telecommunication, B, V University, India

Dr. P. Suresh,
Professor, Karpagam College of Engineering, Coimbatore, Tamilnadu

Mark Leeson
Associate Professor (Reader)
Area of Expertise: nanoscale communications,
evolutionary algorithms, network coding and communication systems

Dr. P. K. Agarwal
Professor, Deptt. of Civil Engineering, MANIT Bhopal ,Ph. D: IIT Kanpur
M.E: Civil Engg.IIT Roorkkee, Membership: Indian Road Congress (IRC), Institute of Urban Transport (IUT)

Shahriar Shahbazpanahi
Islamic Azad University,
Department of Civil Engineering, Sanandaj, Kurdistan, Iran, PhD (Structural Engineering),
University Putra Malaysia, Malaysia

Harun Bin Sarip
Head of Research and Innovation Dept, UniKL-MICET
Doctorate: Université de La Rochelle, France
Member: International Society of Pharmaceutical Engineer, Singapore Chapter

Dr. Buchari Lapau
Professor, Pekanbaru Hang Tuah Institute of Health (STIKes HTI),
Riau, Indonesia

Dr. Bilal Ali Yaseen Al-Nassar
The World Islamic Sciences and Education University (WISE)
Faculty of Business and Finance
Department of Management, Information System (MIS), Amman-Jordan

Dr. Md. Al-Amin Bhuiyan
Associate Professor
Dept. of Computer Engineering
King Faisal University
Al Ahsaa 31982, Saudi Arabia
Prof. (Er.) Anand nayyar  
Department of Computer Applications & I.T.  
KCL Institute of Management and Technology, Jalandhar  
G.T. Road, Jalandhar-144001  
Punjab, India  

Prof. Aleksandr Cariow  
institution or Company: West Pomeranian University of Technology, Szczecin  

Dr. P. K. Agarwal  
Professor, Deptt. of Civil Engineering, MANIT Bhopal, Ph. D: IIT Kanpur  
M.E: Civil Engg. IIT Roorkee, Membership: Indian Road Congress (IRC), Institute of Urban Transport (IUT)  

Dr. VPS Naidu  
Principal Scientist & Assoc. Prof., MSDF Lab, FMCD  
CSIR - National Aerospace Laboratories, Bangalore, India  

Mr. P. Sita Rama Reddy  
Chief Scientist, Mineral Processing Department, CSIR - Institute of Minerals & Materials Technology  
Bhubaneswar, India, M.Tech. (Chem. Engg., IIT, KGP)  

Dr. P. C. Srikanth,  
Professor & Head, E&C Dept, Malnad College of Engineering, Karnataka  
Senior Member IEEE, Secretary IEEE Photonics Society,  
M.Tech: IIT, Kanpur, Ph.D: In IISc Photonics lab  

Prof. Lalit Kumar Awasthi,  
Professor, Department of Computer Science & Engineering  
National Institute of Technology (NIT-Hamirpur),  
PhD, IIT, Roorkee, M. Tech, IIT, Delhi  

Dr. Chandra Mohan V.P.  
Assistant Professor, Deptt. of Mech. Engg., NIT Warangal,  
Warangal. Ph.D: Indian Institute of Technology (IIT), Delhi  
M.B.A: Alagappa University  

Prof. I. Suneetha,  
Associate Professor, Dept. of ECE, AITS, Tirupati, India  

Dr. G Narasimha Reddy,  
Assistant Professor (SG) & Head, Dept. of Electronics & Communication Engineering, JNTUA College of Engineering, Pulivendula,  
Ph.D, J.N.T. University Anantapur, Anantapuramu  

Gurudatt Anil Kulkarni,  
I/C HOD E&T Department, MARATHWADA MITRA MANDAL’S POLYTECHNIC  

Pasuluri Bindu Swetha  
Dept. Of ECE, Sunley college of Engineering & Technology for Women, Hyderabad, India

EDITORIAL

It is my proud privilege to welcome you all to the IASTEM International Conference at Kyoto, Japan in association with The IIER. I am happy to see the papers from all part of the world and some of the best paper published in this proceedings. This proceeding brings out the various Research papers from diverse areas of Science, Engineering, Technology and Management. This platform is intended to provide a platform for researchers, educators and professionals to present their discoveries and innovative practice and to explore future trends and applications in the field Science and Engineering. However, this conference will also provide a forum for dissemination of knowledge on both theoretical and applied research on the above said area with an ultimate aim to bridge the gap between these coherent disciplines of knowledge. Thus the forum accelerates the trend of development of technology for next generation. Our goal is to make the Conference proceedings useful and interesting to audiences involved in research in these areas, as well as to those involved in design, implementation and operation, to achieve the goal.

I once again give thanks to the Institute of Research and Journals, IASTEM, The IIER for organizing this event in Kyoto, Japan. I am sure the contributions by the authors shall add value to the research community. I also thank all the International Advisory members and Reviewers for making this event a Successful one.

SUCCESS LEVEL OF ENGLISH COMMUNICATION BY STUDENTS AT ENGLISH CAMP

PONGSAK RUNGSONG, CHAITHANASKORN PHAWITPIRIYAKLITI

Institution of Lifelong Learning and Creativity
E-mail: pongsak.ra@ssru.ac.th

Abstract - There were two purposes of English Camp for Thai students. First was to understand basic information of world community and to allow Thai students to communicate in English. The population of this study included student participants in the English camp during the December of 2017. This was a qualitative research method. By utilizing the focus group and an in-depth interview, the findings revealed that the success of level of English communication depended on many important factors: Policy of the English camp, Students’ ability to use English, the training format, and the ability of the trainers.

Index Terms - Success, English Communication, English Camp.

I. INTRODUCTION

Nowadays, it is important for Thai students to be able to communicate in English to the world (Wongleedee, 2013). Every day and every step toward the ASEAN Economic Community (AEC) is important for Thai students to improve their level of communication in English and actually it is important for all member countries. Therefore, it is imperative to training our students as a gold human capital to be able to reap the benefit of the coming AEC. Thailand Higher educational institutions have a vital aim that their faculty members and students of many universities of Thailand must be able to fully take advantage of this vital educational opportunity [1] [2]. These faculty members as well as students are important human capitals that should be trained regularly in order to be proficiency to take full advantage of the coming AEC. In fact, English communication is known to be important for Thai students and Thai faculty members. However, E-Learning of English is also an important technology of learning to be implemented to Thailand in order to take the advantage of this effective technology.

From this concept, it is imperative that Thai students need to improve the quality of education and the ability to understand E-Learning of English to catch up with ASEAN neighbors. The improvement of knowledge of E-Learning English technology will help Thai students to enter the ASEAN market successfully [3]. The Centre for ASEAN Studies and Training was assigned to set up the ASEAN English camp to train students to understand about the future skills and knowledge based on English communication. There are many benefits of implement E-Learning English, For example, it can be cost reduction and time saving to deliver the knowledge to a large size classroom than traditional based classroom training. The classroom learning changed to be E-learning could be a huge cut of time and money [4]. This paper was aimed to focus on the level of success and satisfaction of activities of E-Learning set up by Centre of ASEAN Studies and Training in order to use the findings to improve the future activities and understanding of E-Learning English in the future.

II. METHODOLOGY

The purposes of this research was to investigate the level of success and satisfaction of students about the benefits of E-learning they received from enrolling and participating in the ASEAN camp. The population and sample size of this study was all students which consisted of 200 respondents who participated in the ASEAN camp II in Thailand during December of 2017. The ASEAN camp at Pattaya, Chonburi Province was selected as a main area of research study for E-Learning English because it provided many ASEAN training activities of E-Learning English. The sample size of 20 respondents was chosen for qualitative study [5]. Since there were limited numbers of respondents, the number 15 students was chosen from the total population. The data collation was performed via an English questions to elicit respondents’ opinion about the benefits of E-Learning English. There are three parts to the questionnaire. Part one was about the demographic information. Part two was about level of success and satisfaction in the benefits of E-learning and part three allowed respondents to provide their ideas and comments at their free will. The validity of each question in the questionnaire was tested using Item-Objective Congruency or IOC index [6].

III. FINDINGS

In order to find the answer for research questions, the major purpose of the finding section in this research paper were to report the 20 sample characteristics of the students selected from the camp and the main
results of the data analysis from the research questions as well as the level of success and level of satisfaction from evaluating the benefits of E-Learning at the ASEAN camp. A demographic profile indicated that more female than male students members at the camp and were sampled with a ratio of 75:25, or 15 female students and 5 male students. In terms of education level, the first year group made up 50 percent of the sample population and the second year group made up 25 percent, whereas, the third year and fourth year group was the rest of 25 percent.

<tr>
<td>6. The benefit of E-learning is clearly the quality of knowledge received by learners.</td>
<td>4.21</td>
<td>0.7444</td>
<td>6</td>
</tr>
<tr>
<td>7. The benefit of E-learning is clearly the individual attention and self-progress.</td>
<td>4.04</td>
<td>0.6178</td>
<td>7</td>
</tr>
<tr>
<td>8. The benefit of E-learning is clearly the more variety of knowledge.</td>
<td>4.00</td>
<td>0.5874</td>
<td>8</td>
</tr>
<tr>
<td>All categories</td>
<td>4.37</td>
<td>0.7810</td>
<td></td>
</tr>
</tbody>
</table>

From TABLE 1, the mean score can be used to rank the highest to the lowest concerns as follows: 1) The benefit of E-learning is clearly the lower costs of implementation, 2) The benefit of E-learning is clearly the less time consuming and difficulty in using, 3) The benefit of E-learning is clearly faster delivery in the classroom, 4) The benefit of E-learning is clearly more effective learning, 5) The benefit of E-learning is clearly lower environmental impacts. 6) The benefit of E-learning is clearly the quality of knowledge received by learners, 7) The benefit of E-learning is clearly the quality of knowledge received by learners, and 8) The benefit of E-learning is clearly the more variety of knowledge. Also, the mean score of all categories is 4.37 with standard deviation of 0.7810 which indicated that the average level of satisfaction is high and the benefits of E-Learning can be considered high benefits. However, the lowest scores of the variety of knowledge indicated that more can be done in regards to these benefits as well as individual attention.

IV. LIMITATION AND FUTURE STUDIES
The main limitation of this paper came from sampling only 20 respondents of student members in one ASEAN camp which may not represent all the other participants in the other ASEAN camps. As a consequence, the findings may not be proper to generalize. Therefore, future research should use at least 400 respondents with random sampling to get more variety of people from all the camps. Also, future studies should cover not only the level of satisfaction in the benefits but also the reasons that participants were satisfied or were not satisfied with each benefits of E-Learning in each category.

CONCLUSIONS
This was a study that use mainly a qualitative research method with a small group sample. By utilizing the focus group and an in-depth interview, the result revealed that the success of level of English communication depended on many important factors: Policy of the English camp, Students’ ability to use English, the training format, and the ability of the trainers.

ACKNOWLEDGMENTS
The author would like to thank the Research and Development Institute, Suan Sunandha Rajabhat University, Bangkok, Thailand for financial support. The author also would like to thank Asst. Prof. Dr. Kevin Wongleedee, Director of Institution of Lifelong Education.
Learning and Creativity for proof reading this research paper.
